

## Example: treatment plan

address	Mr John Example
date	18.1.2018
sort of plant	Peach tree
problem/disease/pest suspected	Black peach aphids
recommended remedy	<b>XXX C 30</b> , 1 application.
dosage	8 globules for 30 liters of water. First let dissolve the globules in 150 ml of water. It is practical to use a screw top lid to shake the mixture well. Put 1/3 of the mixture in a plastic watering can filled with 10 liters of water. Stir with a wooden stick and water the roots. Repeat these steps with the remaining 2/3 of the remedy mixture. The 150 ml remedy mixture is enough for 30 liters of water in all.
recommended remedy to follow	1 week later: <b>YYY C 200</b> , 1 application.
further action	If you see no improvement: apply <b>ZZZ C 200</b>
dosage	Like above. Repeat <b>ZZZ C 200</b> 2 times, interval of 5-7 days between the applications.
other	<b>XXX C 30</b> is a helpful remedy against aphids on roses and all plants of the family "rosaceae". <b>YYY C 200</b> helps against pests on plants with hard leaves.
